RE: Letter of Recommendation for Product: AIRCOSEVER™

To Whom It May Concern:

Cardinal Services has installed several of the AircoSaver™ devices in various sizes of HVAC cooling equipment for the City Of Windsor.

When the AircoSaver™ was tested for O.P.A. (Ontario Power Authority) incentive approval, Enwin Utilities requested that a number of units be tested to verify savings. On units tested the average savings was 27.75%.

HVAC equipment was tested with and without AircoSaver™ under same operating conditions.

We are not aware of any warranty claims to date for defective AircoSavers that we have installed, nor have we experienced any negative operating conditions with the HVAC equipment as a result of this installation of this component.

Cardinal Services endorses the use of this product as an energy saving device.

Thank you,
Steve Girard

Region Manger,
Cardinal Services Group
